

# Welcome, Partners!

Protecting consumers' data privacy is more critical than ever. 86% of consumers are concerned about data privacy, and more and more regions are responding to that concern with new data privacy regulations. Companies that don't comply with these regulations can face brutal financial penalties. Osano can help.

## Why Osano?

-  **Simplify privacy program management:**  
Osano's gets you up and running quickly so you can steer clear of hard-to-implement tooling that keeps you out of compliance longer.
-  **Automate complex compliance work:**  
Avoid the errors and risks that come with manual processes. Features such as consent management automation and subject rights automation give you time to focus on your most critical priorities.
-  **Gain confidence in your compliance:**  
Stay compliant without the fear of fines or penalties with the industry's only "No Fines. No Penalties." pledge. Osano's global team of legal privacy experts continuously monitors the privacy landscape, keeping you and the platform up-to-date.

## Osano By the Numbers
